

## Quality Statement

njo Technology Ltd. is committed to the design and manufacture of quality LED lighting solutions. We will always endeavour to meet our customer's expectations with on-time delivery and cost effectiveness without compromise to the quality of the end product. We will continue to achieve this by promoting a philosophy of "quality and pride in all we do" and a total dedication to continuous improvement.

The keys to this commitment to quality are:

- A total company effort to ensuring that "right first time" practices are in place in all that we do.
- To source experienced and professional suppliers and develop mutually beneficial relationships with them.
- To combine the latest technologies and techniques with our extensive manufacturing experience to ensure best practices are always in place.
- To provide our employees with the appropriate training.
- Making continuous improvement a common place occurrence.

Our Quality System is aligned to BS EN ISO9001. As part of our ongoing quality improvement programme we are currently working towards BS EN ISO 9001:2008 accreditation. The QMS and Quality Policy are regularly reviewed by the Quality Team under the guidance of the Operations Director. At each review, objectives and improvements are established and a review of previous targets is undertaken.

Mr. M. Rawlinson

Director
